

Eventree Knowledge Base

Purpose: This document describes Eventree's users, vendor categories, profiles, event management, vendor booking, packages, availability, reviews, ratings, and related rules. It is structured for use as a knowledge source for an Eventree RAG chatbot.

1. About Eventree

Eventree is an event planning and vendor booking platform that helps customers find, save, share, and book vendors for their events.

Eventree has two types of users: Customer and Vendor.

Customers use Eventree to organize events and find suitable vendors. Vendors use Eventree to create and manage their business profiles, packages, availability, and booking requests.

2. User Types

2.1 Customer

A Customer is a user who uses Eventree to organize events and book vendors.

- Search for vendors.
- Filter vendors by category, date, rating, and price/budget.
- Save preferred vendors.
- Share vendor business profiles.
- Create multiple events.
- Add vendors to events.
- Send booking requests to vendors.
- Select a vendor package while booking.
- View vendor amenities.
- Review and rate vendors after an event is completed.

2.2 Vendor

A Vendor is a business or service provider that offers event-related services through Eventree.

- Create and manage a business profile.
- Upload business images.
- Add portfolio information and gallery images.
- Add a business description.
- Set availability through a calendar.
- Add amenities.
- Create up to 3 packages.
- Set package prices.
- Accept booking requests.

A vendor can belong to only one vendor category.

3. Customer and Vendor Accounts

A Customer account cannot be converted into a Vendor account. If a customer wants to become a vendor, they must create a separate account. The same account cannot function as both a Customer and a Vendor.

4. Customer Profile

A customer profile contains:

- Name
- Email
- Profile image
- Phone number
- City
- Address

Customers can update their profile information and upload or change their profile picture.

Profile update: Navbar → Profile → Edit Profile → update information → save changes.

5. Changing Customer Password

Customers can change their password from their profile.

Steps: Navbar → Profile → Change Password → enter required information → save the new password.

6. Vendor Categories

1. Caterers — Vendors that provide food and catering services for events.
2. Event Venues — Vendors that provide venues or locations for events.
3. Decorators — Vendors that provide event decoration and related services.
4. Photographer & Videographer — Vendors that provide event photography and videography services.
5. Event Management — Vendors that provide event planning, coordination, and management services.

Category rule: A vendor can belong to only one vendor category.

7. Vendor Business Profile

A vendor business profile can contain:

- Vendor/Business name
- Business image
- Portfolio
- Gallery
- Business description
- Availability

- Amenities
- Packages
- Pricing

Customers can visit a vendor's business profile to learn about the vendor before making a booking.

8. Vendor Packages

A package is a predefined service offering provided by a vendor. Packages can organize different service levels or tiers, such as Basic, Standard, and Premium. Exact package names and services may vary by vendor.

- A vendor can offer a maximum of 3 packages.
- A vendor cannot offer more than 3 packages.
- A vendor can set the price of each package.
- Customers can view available packages.
- Customers can select a package during booking.

Customers can view packages from the vendor's business profile.

9. Vendor Amenities

Amenities are additional facilities, features, or services provided by a vendor. Vendors can add available amenities to their business profile, and customers can view them before booking.

10. Vendor Availability

Vendors can manage their availability through a calendar. They can indicate which days are Available or Busy. Customers can view vendor availability when considering a vendor for their event.

11. Finding and Filtering Vendors

Customers can filter vendors according to their requirements using:

- Category
- Date
- Rating
- Price/Budget

Customers can use one filter or multiple filters together. For example: Category + Date + Rating + Price.

12. Category, Rating, Price and Date Filters

Category: Select the required category and apply the filter.

Rating: Filter vendors according to their existing customer ratings. Ratings use a 5-star system.

Price/Budget: Filter vendors according to the customer's preferred budget or price range.

Date: Filter vendors based on the customer's event date to find vendors available on that date.

13. Saving Vendors

Customers can save vendors from the vendor's business profile using the Save button. Saved vendors can be accessed through Profile → Saved Vendors. A customer can remove a saved vendor from that section.

14. Sharing Vendor Profiles

Customers can share a vendor's business profile using the Share button available on the vendor's business profile.

15. My Events

My Events is the section where customers create and manage their events and organize the vendors required for those events. A customer can create multiple events.

16. Creating an Event

Steps:

- Go to Profile.
- Select My Events.
- Click Create Event.
- Provide the required event information, including the event date.
- Create the event.
- Manage the event and add required vendors.

The event date is important for determining vendor availability.

17. Adding Vendors to an Event

After creating an event, a customer can add vendors through booking requests. The basic process is:

Create Event → Select Vendor → Select Package → Send Booking Request

The vendor must respond to the booking request before the vendor is confirmed.

18. Booking and Confirmation

The complete booking workflow is:

Create Event → Add Vendor → Send Booking Request → Vendor Accepts → Event Confirmed → Event Date Passes → Event Completed → Review Vendor

A vendor is confirmed for an event only after the vendor accepts the booking request.

19. Multiple Vendors in One Event

A customer can add multiple vendors to an event according to the event's requirements. However, an event cannot contain multiple vendors from the same category.

Example allowed: 1 Caterer + 1 Decorator + 1 Photographer + 1 Event Manager.

Example not allowed: 2 Caterers in the same event.

20. Rejected Booking Request

If a vendor rejects a booking request, the booking/event status becomes Cancelled. The customer can then consider another suitable vendor.

21. Event Completion

An event becomes Completed after the event date has passed.

Lifecycle: Created → Booking Process → Confirmed → Event Date Passes → Completed

22. Event Cancellation and Deletion

Currently, customers cannot delete or cancel an event after creating it.

23. Reviews

Customers can review vendors after their event has been completed. Customers cannot review a vendor before the event is completed.

24. Vendor Rating

Customers can rate vendors using a 5-star rating system after the event has been completed.

25. Review Rules

- A customer can review a vendor only after the event is completed.
- A customer cannot review a vendor before the event is completed.
- A customer cannot submit multiple reviews for the same vendor for the same event.
- Reviews cannot be edited.
- Reviews cannot be deleted.

26. Customer Event and Vendor Relationship

The event management system allows customers to organize the vendors required for a specific event. For example, a customer organizing a wedding may need a Caterer, Event Venue, Decorator, Photographer/Videographer, and Event Manager. Each selected vendor is added through the booking request process.

27. Frequently Asked Questions

Q: Can a customer create multiple events?

A: Yes. A customer can create multiple events.

Q: Can one event have multiple vendors?

A: Yes, but multiple vendors from the same category cannot be added to the same event.

Q: Can a vendor belong to multiple categories?

A: No. A vendor can belong to only one category.

Q: Can a vendor offer more than three packages?

A: No. A vendor can offer a maximum of three packages.

Q: Can customers choose a vendor package?

A: Yes. Customers can select a package during the booking process.

Q: Can customers see vendor amenities?

A: Yes. Amenities are visible on the vendor's business profile.

Q: Can customers save vendors?

A: Yes. Customers can save vendors from the vendor's business profile.

Q: Can customers share vendor profiles?

A: Yes. Customers can share the vendor's business profile link.

Q: Can customers review vendors before an event is completed?

A: No. Reviews are available only after the event is completed.

Q: Can customers review the same vendor multiple times for the same event?

A: No. Only one review is allowed for the same vendor for the same event.

Q: Can reviews be edited or deleted?

A: No. Reviews cannot be edited or deleted.

Q: Can a customer account also be used as a vendor account?

A: No. A separate account is required for becoming a vendor.

28. Quick Reference: Eventree Rules

Reviews	Only after event completion
Rating	Out of 5 stars
Multiple reviews for same vendor/event	Not allowed
Review editing	Not allowed
Review deletion	Not allowed
Event deletion/cancellation	Not available
Customer → Vendor conversion	Not available; separate account required

29. Out-of-Scope Questions

If a user asks the Eventree chatbot about something that is not covered by the available Eventree knowledge, the chatbot should respond politely instead of inventing information.

Suggested response: "Sorry, I don't have enough information about that topic. I can help you with Eventree's customers, vendors, events, bookings, packages, availability, reviews, ratings, and other available features."

The chatbot should not invent or assume an Eventree feature that is not documented in the knowledge base.
